Soft Skills: Decision-making & Strategic problem solving, Teamwork & collaborative leadership, Adaptability & Continuous learning, Customer Engagement

Professional Experience

PROJECT MANAGEMENT TRAINER

Apr 2024 - Current

NATIONAL INSTITUTE OF TECHNOLOGY - PERTH, AUSTRALIA

- Train and assess students specifically in cost, scope and schedule management, stakeholder engagement, delivery and performance management, risk management, project integration, governance, procurement, and program management, ensuring alignment with current industry standards and best practices.
- Use the latest methodologies, tools, and frameworks in project management: Agile Practices, PMBOK 6th and 7th edition to equip students with real-world skills that meet the evolving needs of the industry.
- Design and maintain assessment tools that evaluate students on project-specific domains such as risk assessment, cost analysis, procurement planning, and schedule management, ensuring they meet the training package, industry, and regulatory requirements.
- Establish a learning environment where students can apply project management theories in simulated or real-world scenarios, promoting hands-on learning in project planning, risk mitigation, and governance.
- Ensure the delivery and assessment methods comply with relevant VET regulations, focusing on developing competencies in key project management areas such as stakeholder management, quality control, and resource optimisation.
- Utilise advanced project management software, mainly MS Project, Libre, Jira, Miro and Trello, and tools for teaching concepts such as scheduling, risk analysis, and procurement planning, providing students with practical experience in current industry tools.

PROJECT MANAGER (REMOTE)	Jul 2022 - Jul 2023
LEAPFROG TECHNOLOGY INC. - SEATTLE, WASHINGTON, US	
ASSOCIATE PROJECT MANAGER	Jul 2020 - Jun 2022
LEAPFROG TECHNOLOGY INC. - KATHMANDU, NEPAL	
<ul style="list-style-type: none"> ● Led and managed medium-scale projects through the entire software development lifecycle using Agile development practices. ● Facilitated and coached cross-functional teams of over 50 members in Agile ways of work, ensuring value-driven integration of activities within timeframes, scope and quality standards. ● Achieved project goals for multiple projects by building and maintaining strong relationships with project stakeholders and leading customer needs and feedback through proper feedback loop process, communication, and change management. ● Developed and reviewed estimates and assumptions for the project's schedule, effort and cost using established guidelines and best Agile practices. ● Handled requirement elicitation and development, change management, risk management, backlog prioritisation, sprint planning, release, daily standups, reviews and overall execution. ● Managed the development and review of project artifacts, including technical requirements, user experience design, architecture, testing and implementation documentation. ● Maintained quality assurance and control per project requirements. ● Handled staffing for different projects, monitored and analysed team performance, identified opportunities for improvement, and implemented strategies to achieve KPIs. 	

BUSINESS ANALYST	Apr 2019 - Jul 2020
ESEWA FONEPAY PVT. LTD.- KATHMANDU, NEPAL	
<ul style="list-style-type: none"> ● Gathered, analysed and documented key stakeholders' business, functional and non-functional requirements while defining the project scope and objectives. ● Performed feasibility analysis and evaluated implementation options for new or existing systems in multiple eSewa modules while assessing the impact of new requests and changes. ● Managed and coordinated the planning, execution, monitoring, control and closure of information and digital integration projects from requirement specification and gathering to development, testing and deployment, ensuring adherence to schedule, scope and quality standards. ● Facilitated as a scrum master and product owner in an agile software development environment to organise the team and meet project objectives within timeline and value delivery. ● Facilitated and coached team in agile ceremonies, requirement analysis, and product improvement events, resulting in a collaborative and innovative development culture. ● Led requirement elicitation sessions, including initial analysis, business case, solution assessment and validation, integration testing, use cases, wireframing/mockups, and test validations.
